

## **TSUNAMI 2 x HDD Enclosure – QUICK SETUP GUIDE for MAC USER**

1. Connect USB and Switch on the unit
2. Select the Raid mode required (0, 1 ..)
3. Hard drives will be detected in MAC's 'Disk Utility'
4. Press 'reset' for 10 second, let it go, user should now see the disconnect+reconnection of HDDs
5. Select the new hard drives, choose the format required, and format them all under 'ERASE'
6. Go back to the first column of 'Disk Utility', click 'verify' and check if the formatted HDDs are all OK

### NOTE:

\*If you are not sure which HDD format to use, use the same format as your System Disk

\*If 'Resource Busy' appears:

- Try another USB port and unplug all other USB devices
- Try to restart your MAC
- Try to format HDD on another MAC and see if it works

Thank You for using  products!
