

# TSUNAMI MJR2 Media Centre Case FAQ

## 1. PCI-E card

- MJR2 will support one PCI-Express card or one VGA card (but not both).

- The bundled Riser card do not support old type PCI card, a flexible PCI riser (not included) will be required for this type of application.

## 2. PSU

- MJR2 comes with real rating safety 300W (Max) quality power supply, which is powerful enough for most type of media centre PC usage.

## 3. Motherboard and CPU

- MJR2 is co-designed by Tsunami and Intel© to Intel based motherboard and CPU specifications. For AMD CPU, processor cooling fan from third party may be required to suit the patented air hole height limit.
- MJR2 is designed to motherboard with PCI slot located at the first bay of the board. Please check this carefully while selecting motherboard should any PCI-E card or VGA card installation is required.
